ADVICE

Calling yourself a 'Professional Engineer' without having the required credentials can result in a breach of statute law. Protection of their professional standing to provide advice as a qualified Engineer is their right and is provided for through legislation. Therefore we require a resume so that your professional standing is readily known to those you communicate with.

DISCLAIMER

In order to provide services without cost we endeavour to keep our overheads as low as possible. As such, we take people at their word. In other words, if you say you completed a 'bachelor of engineering' we accept this. However we proclaim to all that may engage anyone on a professional basis as an 'Engineer' to always check their credentials.

We are not a recruitment company. If we were, the norm would be to allocate resources to checking resumes by various means including interviews with job seeks, telephoning their referees, and writing to the university where they acquired their credentials.

If someone believes that a network member has made credential claims that are suspect, we will allocate resources to investigating the matter. If a problem exists they will be black listed from the network and the relevant authorities notified.

COPYRIGHT

Notwithstanding 'trade secrets' we believe that a lesson learnt should be a lesson shared.

Your project boards are open to your other network members.

You should keep in mind that if a photograph is taken by you and hosted on an open network forum it may be copied. If you wish to copyright a photograph we suggest that the photograph carries the copyright mark and that your website has a 'copyright statement'.

We allow network members to copy images on this website provide they are not on-sold to a competitor. For example, a competing web based provider offering hosting services to 'Engineers' copy our photographs and use them as a resource on their site for their subscribers. To allow our photographs from this network to be used by others in this way would constitute a breach of trust with your network members.

OTHER SERVICES

What allows us to provide base services free-of-charge are our sponsors and the provision of fee-for-service products such as an upgrade to your existing email and hosting service.

For instance, if you would like pop email accounts or a high quality web site complete with restricted folders that require a username and password to access than we can provide this at a very competitive cost.

Our content and web developers work in consultation with you to build a custom website either hosted on this service or as a standalone domain name. The alternative to expensive hosting is to host your website on the Engineer.net.au server. Factored into the fee for producing a custom website is hosting for two years as www.engineer.net.au/yourname.htm .

SPONSORS

The sponsor of the initial release of this website is Environics (Qld) Pty Ltd.

If you would like to advertise engineering related goods and services please do not hesitate to contact us.

CONCLUSION

Thank you for reading this page. Please visit as this site is in a state of evolution and fresh material is being added weekly.

Yours Sincerely,
Engineer.net.au

Sandra Lyons
